Care and Control: cancer and senescence

Learn more. A real challenge ! Here are some key words for browsing on the web.....

The aim is to stem metastasis after the NHS therapies and surgery that is, avoiding failed remission.
Next; to encourage prophylaxis in mid-life when unknown dysplasia is setting in from carcinogens.

re: **cancer care and control** and helping too with anti-aging plus neuro-degenerative conditions ***

Stilserene, the medical protocol

Advice: please confer with your GP and oncologist.

salvestrols: organic fruit essences consisting of essential phytoalexins and stilbenes ... **“a daily equivalent to ten bottles of red wine”** ! Quoting Professor David Sinclair, Harvard Medical School and next, quoting Professor Potter 7th July 2005 * **“the healing equivalent to 100 kg organic fruit !”**

CYP1B1 protein enzyme; is signalled up and mutates a normal cell having become dysplastic from carcinogens much earlier in life. Cancer sets in developing chaotic unwanted mitosis paralysing organs and transmissions systems.

This enzyme converts the salvestrols into destructive cytotoxins such as piceatannol, This is a rare naturally occurring cytotoxin.

(Request the 25 testimonials and scientific peer reviews published over the past seventeen years).

Professor Gerry Potter team leaders who discovered and established the development at
Professor Danny Burke De Montfort University, Leicester, Cancer Drug Discovery Group.
Browse video: “Professor Dan Burke on salvestrols - interview with Orthokennis” dated 3rd Dec 2015.

or try the link <http://www.youtube.com/watch?v=XzuHbmhTYWQH> plenty of information

more info; product choice from about 65p/day, contact:

shops: Mrs Sammy Brown mail order too and also from

Bio-Five-0

To counter the effects of chronic inflammation manufacture *** KLOTHO in the body; just **add** essential enhancing Vitamin D3, Co-enzyme Q10, biotin and niacin(nf). Exercise daily! (30 min walk).

We have to **avoid Vitamin B17**, (leatrole), **flax seeds** (flax oil is OK), **apricot kernels** (contains cyanide) and **grapefruit** (naringenin) all of which prevent essential bio-availability and blocks mitochondrial repair.

Request pdf essay “Cancer Dynamics” acknowledged by NHS, quoting the National Medical Director on 13th Aug 2015 and Royal College of General Practitioners as being of interest,

Regretfully there is no cure for cancer

Michael Cleary Hon. Sec. **The ResQ Club**
